

CERTIFIED ADVANCE FINANCIAL MODELLING & VALUATION ANALYST

in association with

Delhi Technological University & FinX

Why Certified Advance Financial Modelling & Valuation Analyst ?

The Certified Advance Financial Modelling & Valuation Analyst (CAFMVA) is a top certification for students interested in finance. Our new program covers financial modelling, research, and stock selection. We start with clear concept teaching, followed by hands-on Excel practice using industry tools. The course is designed to match real-world finance needs and helps you build strong, job-ready skills. Perfect for those aiming for careers in investment banking, equity research, or corporate finance.

-  Enhanced analytical skills for accurate decision-making and strategic planning.
-  Deep expertise in valuation methods ensures precise investment assessments.
-  Ability to build high-quality financial models using industry best practices.
-  Advanced techniques to identify and mitigate financial risks.
-  Strong adaptability to market fluctuations and economic changes.
-  Opens career opportunities with higher earning potential and professional growth.

Master the model, master the market.

Course Elements

The best way to excel in financial modelling and valuation is by gaining a strong foundation backed with practical, real-world application. The CAFMVA course is designed to equip learners with advanced skills in financial modelling, valuation techniques, and data analysis using industry-standard tools and practices. With a simplified and hands-on approach, this program prepares you to make accurate financial decisions and build reliable models – essential for careers in investment banking, equity research, and corporate finance.

ABOUT DTU

Delhi Technological University has an illustrious history of providing quality education and promoting research and entrepreneurship for over eight decades. With 84 years of its long-established tradition of excellence in engineering & technology education, research and innovations, Delhi College of Engineering, (initially established with the name – Delhi Polytechnic) came into existence in the year 1941 to cater the needs of Indian industries for trained technical manpower with practical experience and sound theoretical knowledge. The institution was set up at historic Kashmere Gate campus as a follow up of the Wood and Abott Committee of 1938. It comprised of a multi-disciplinary and multi-level institution offering wide ranging programmes in engineering, technology, arts and sculpture, architecture, pharmacy and commerce. The national diploma awarded by the institution was recognized as equivalent to degree level for the purposes of employment. In 1952 the college was affiliated with University of Delhi and started formal Degree level Programmes. The department of Architecture later became the School of Planning and Architecture, now a Deemed University and Institution of National importance. The department of Arts and Sculpture became College of Arts and the departments of Chemical Technology and Textile Technology were shifted out en-block to mark beginning of the IIT Delhi at its new campus at Hauz Khas. The department of commerce was later abolished and the faculty of management studies of the University of Delhi was established by Prof. A Das Gupta, of DCE. Delhi College of Engineering is thus the mother institution of a number of national projects including IITD, SPA, College of Arts and even the famous FMS.
